

Research Management Associations (RMA) Board Effectiveness

A Complimentary 1 Hour Webinar Presented by INORMS
The International Network of Research Management Societies

European Edition - August 31, 2016

Asia/Australia Edition - September 1, 2016

INORMS is the umbrella to 15 global research management (RM) associations with over 20,000 members. Quality leadership of our associations is critical to their success!

Effectively running the governance boards of our global research management associations is a huge challenge. Our boards are made up of members of our profession who have busy day jobs and are volunteering their time! Many of us may not have been board members before we chose to volunteer and help lead our associations.

This INORMS webinar is being presented by some of the most experienced RM board members in the world with many years of serving as boards members and chairpersons/presidents of their associations.

The speakers,

Jan Andersen, European Association of Research Managers and Administrators, EARMA;

Martin Kirk, Canadian Association of Research Administrators, CARA;
and

Kathleen Larmett,

National Council of University Research Administrators, NCURA;

will share their knowledge and experience on how successful boards work and how to help your associations "grow and prosper".

This webinar is aimed at existing members of RM boards who wish to sharpen their governance skills or members of the associations who may wish to serve as board members in the future. Please share this notice with colleagues who may be interested
